

Changes in Webshop G5 version 2.41.1

General

New Features

(1853) Added a more mobile friendly interface to "Quick order".

Corrections

(1911) All parts were displayed under Linked parts, when filtering, if no parts were linked.

(2079) Address field 4 is no longer required when private persons create user accounts.

(2084) Prices on parts could become zero on the start page, if the minimum quantity was set to zero.

(2087) Removed orders are no longer displayed in "My orders".

(2092) The quantity in the Shopping list could not be changed if it got set to 0 and min quantity was 0.

(2122) When registering a customer account, the first field could be set to "receiver".

(2124) If you use a discount code, the order total, on which the discount will be based, will be calculated excluding shipping rows.
