

# Changes in Webshop G5 version 2.41.2

## General

### New Features

**(2078)** Text has been added to the Cookie page regarding the use of the browser's local storage.

### Corrections

**(1910)** The part configuration data sent to the browser is streamlined to increase the performance.

**(2039)** The stock balance on the quick order and the regular shop could differ.

**(2129)** Decimals on balances now follow the setting for how many decimals that should be displayed.

**(2137)** During certain circumstances, the total price of the shopping list could be incorrect.

**(2149)** If the user session expired after a completed purchase and the user was still in the order summary, an error message could be displayed.

Users will now be redirected to the webshop start page.

**(2183)** An error could occur in My quotes if no reference was set on a quote.

**(2190)** During certain circumstances, the navigation to the "User list" could cause a program error.

**(2191)** Resolved issues where an error could occur in My quotes if no price was set on a row.
