Changes in Webshop G5 version 2.42.1

General

New Features

(1908) Performance improvements due to loading non-essential libraries later on the page, and hosting commonly used libraries on Content Delivery Networks (CDN).

(1943) Improved error message handling related to part configurations when user is logged out due to inactivity.

(2078) Text has been added to the Cookie page regarding the use of the browser's local storage.

Corrections

(2130) During certain circumstances the "Quick order" would not follow rules set for a part. The settings include the number of decimals, minimum quantity and available for purchase.

(2190) During certain circumstances, the navigation to the "User list" could cause a program error.

(2191) An error could occur in My quotes if no price was set on a row.

(2202) The "Add to shopping list" button was displayed for customers without access to the shopping list.

(2214) The Shopping cart price wasn't updated when you removed a row.
